

NCROACH GEL

American
Cockroach

German
Cockroach

NCROACH GEL is a new technology product, specific for cockroach control. The unique application method makes it a suitable product for managing cockroaches in vending machine. NCROACH GEL contains Imidaclopride 2.15% as the active ingredient and food bait matrix which attracts the cockroaches. NCROACH GEL has to be applied by the unique applicator gun and needle. NCROACH GEL has attractant that lures cockroaches ensuring its consumption which kills cockroaches. NCROACH GEL Contains molecule Imidacloprid 2.15% Gel as an Active Ingredient.

MODE OF ACTION: NCROACH GEL has an exclusive domino effect wherein delayed killing action enables one contaminated cockroach to kill many others.

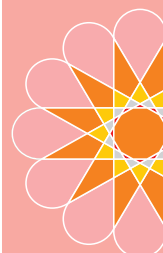

MODE OF APPLICATION: Remove the cap from the cartridge tip and fit the needle or use directly to apply gel. Touch the tip to the surface and depress the plunger of the cartridge or lever of the bait gun. Gel is applied as spots or as a line along crack and crevices or places where cockroaches are likely to hide or breed. For an effective control, apply 3 to 4 gel spots/sq.cm area and each gel spot with 3-5 mm diameter in size. If cockroaches are seen reapply gel. Do not apply gel in areas which are frequently washed.

RECOMMENDATION: This gel is recommended for effective control of German and American cockroaches in houses. Cockroaches are attracted to the gel and after feeding, the cockroaches are killed. Application of gel is convenient for use.

PRECAUTION AND CARE:

- ❖ Wear gloves during application.
